Any determination of compatibility shall be based upon the standards set forth in this section as well as the character, design and appearance of one or more residential dwellings located outside of mobile home parks within 2,000 feet of the subject dwelling where such area is developed with dwellings to the extent of not less than 20% of the lots situated within said area; or, where said area is not so developed, by the character, design and appearance of one or more residential dwellings located outside of mobile home parks throughout the township. Trees and shrubs in a space not more than 30% but not to exceed 50 feet wide may be trimmed or pruned for a view of the fronting waters and for access thereto. A lot shall be regarded in its natural condition when there is at least one tree or shrub having a height of at least 15 feet for each 100 square feet of area thereof in wooded areas or sufficient natural cover in open areas.

(2) All permitted uses shall be subject to setback requirements except pump houses and recreational docks within the cleared area, erosion control devices, and associated facilities when located and designed so as not to unreasonably interfere with, degrade or decrease the enjoyment of the existing uses and water resources.

(3) Regulations imposed in areas identified as erosion control districts or flood hazard districts, this chapter shall govern if such restrictions or regulations impose higher standards or requirements.

(4) Where these provisions apply to a nonconforming lot-of-record, the minimum setback may be reduced by the Zoning Administrator to 25 feet provided the said lot cannot normally accommodate any structure within the imposed original setback requirements.

Upon receipt of the ten copies of the fully and properly completed application form with the required documents attached, the Administrator shall retain a copy and shall distribute the remaining copies as follows: one copy to the Township Engineer, one copy to the Township Attorney and seven copies to the Commission.

(B) Upon receipt of an application, the Township Engineer shall review the application and attachments, physically inspect the premises to determine compliance with the prior reclamation plans and operational plans, and report to the Administrator on such compliance. The Township Engineer shall also estimate of the cost of reclamation upon abandonment for bond amount purposes, and make such additional comments regarding general safety, drainage, equipment removal and other engineering considerations pertaining to the special use permit application as appropriate. The report by the Township Engineer to the Administrator shall be rendered no later than 30 days after receipt of a complete application.

(C) The Administrator shall make a final recommendation on the approval or disapproval of the submitted reclamation plan and operational plan within 30 days of receipt of the Township Engineer's report and shall report forthwith their recommendation concerning the reclamation plan and/or operation plan to the Commission. The Commission shall make a final determination within 30 days of receipt of the recommendation of the Administrator. Failure of the Commission to act within such time frames shall not result in an automatic special use permit issuance or renewal, but such failure merely results in an extension of any existing license for an additional period up to the time of final determination by the Commission.
(Ord. 25, passed 9-1-1999)

Upon finding the applicant has complied with the terms and conditions of this subchapter and with the terms and conditions of prior licenses and prior submitted plans, if any, a license shall be issued.

(Ord. 25, passed 9-1-1999)

153.213 CONDITIONS IN LICENSE.

Upon the issuance or renewal of a special use permit, the Commission may impose as conditions of the special use permit reasonable restrictions or requirements related to the location, design or operation of a mining site, as required to secure the public health, safety and general welfare of the community or to ensure that the mining operations will not create a nuisance or unreasonably interfere with the enjoyment of property.

(Ord. 25, passed 9-1-1999)

153.214 FENCING AND SCREENING.

(A) The Commission, based upon the application, the Township Engineer's report and taking into account the unique topography of the site, and adjoining residential or commercial uses, may require fencing and/or a berm.

(B) Any such required fencing and/or screening shall be as follows.

(1) *Operations of one year or less.* Temporary fencing of a vinyl/plastic snow-fence type may be used, or any other more permanent fencing at the option of the operator.

(2) *Operation of more than one year.* Woven wire fencing or other permanent fencing as approved by the Commission.

(3) *At the end of operations.* The Commission may require a permanent security fence to be installed, if the site as reclaimed poses any significant risk or danger that would be reduced by a fence.

(4) *Active mining excavations.*

(a) Active mining excavations may be visually screened from the view of residentially used parcels to a person standing on the lot line of adjacent parcels.

(b) The following methods are acceptable for screening of mining areas:

1. Construction of a raised earth berm area on the mining site along boundary lines thereof where such lines abut privately owned property which is improved and occupied for residential or commercial purposes. This provision with regard to lands improved and occupied for residential purposes shall also be applicable to any land upon which dwellings are built and occupied currently or subsequent to the date of this subchapter. The berm shall be sufficient in length and height to screen the mining area. During the next planting season following the placement of the berm, and as often as may be necessary to assure the existence of a vegetative ground cover, the applicant shall seed or plant the berm in a manner suitable for the area and soil conditions so as to provide vegetation to check erosion and to provide a visible ground cover substantially similar to the vegetation cover growing nearby. Where the topography of the area acts as a screen, the Commission may waive the berm requirement. The berm shall have slopes not in excess of one-foot vertical to two feet horizontal;

2. Planting of coniferous trees along the boundaries of the property with sufficient rows and depth to permit effective screening of the mining area;

3. To the extent that the foregoing is not practical, the proposed applicant may submit alternate proposals for screening; and

4. The amount and extent of required screening shall be reasonable and practical for the particular mining site and adjoining land uses as determined by the Commission.

(Ord. 25, passed 9-1-1999) Penalty, see 153.999

153.215 HOURS OF OPERATION.

Maximum hours of operation of the mining operation shall be 7:00 a.m. to 7:00 p.m. Monday through Friday, and from 7:00 a.m. to noon on Saturday. No hours of operation shall be permitted on Sundays and legal holidays. In emergency situations, this time period may be modified by the Township Supervisor provided such emergency order shall not be effective for more than 72 hours.
(Ord. 25, passed 9-1-1999) Penalty, see 153.999

153.216 ROAD ACCESS.

All sites licensed under the provisions of this subchapter shall have access to a county road having a minimum right-of-way width of 66 feet and improved to the specifications of the County Road Commission. Entrances and exits shall be gated and securely locked after working hours, weekends and holidays.
(Ord. 25, passed 9-1-1999)

153.217 ROAD MAINTENANCE.

Access roads within the site shall be maintained by the operator so as to minimize the dust arising from the use of said roads. Such maintenance shall be as required by the special use permit. Application of oil shall be prohibited. In order to minimize the deposit of dirt and gravel from trucks onto the public highway, a paved access road not less than 300 feet in length may be required when the mine exits onto a paved county road. When the operation of a licensed area results in the mined material, overburden and/or similar material being deposited or spilled upon the public roadway, it shall be the responsibility of the operator to remove such material immediately.
(Ord. 25, passed 9-1-1999)

153.218 OPERATION OF USE.

All equipment and facilities used in the mining of sand, gravel and stone shall be conducted, maintained and operated in such manner as to eliminate insofar as practicable, noises, vibrations or dust which interfere with the reasonable use and enjoyment of surrounding property.
(Ord. 25, passed 9-1-1999)

153.219 NOISE STANDARDS.

(A) Mining sites shall be operated such that the noise of operation or equipment vibration cannot reasonably be considered disturbing to neighboring uses of land. Objectionable noises due to intermittence, beat, frequency or shrillness shall be muffled so as not to become a nuisance to adjacent uses. Equipment on licensed sites at any time or under any condition shall not be operated so as to result in noise exceeding the following levels for specified adjacent land uses when measured at the common property line nearest the active work area.

<i>Adjacent Use</i>	<i>Maximum Sound Level</i>
Commercial	85 dBA
Industrial and other	90 dBA
Residential	75 dBA

(B) Monitoring shall be accomplished by using weighted decibel measurements (referenced to 20 micro Pascals) with a type of audio output meter approved by the United States Bureau of Standards.

(C) As a condition of any such special use permit, the operator shall be responsible to obtain and pay for a noise level test at the demand of the Administrator. Any such test shall be conducted within 14 days of demand. The time and circumstances of the testing will be determined by the Administrator. The number of operator paid tests shall be limited to one per month.

The condition of such bond being that if upon completion of applicant's activities on the parcel(s) described in the application, the land has been reclaimed to the satisfaction of the Administrator, the bond shall be void; otherwise, the township shall have the right to use the bond proceeds to the extent necessary to reclaim the parcel(s). This bond shall be kept in effect by the applicant until the parcel(s) have been restored as required by this subchapter. Until such time the township and its agents and contractors are hereby granted a license to go on the applicant's parcel(s) to fulfill the bond requirements. In fixing the amount of the surety performance bond, the Township Engineer shall take into account the size and scope of the proposed operation, current prevailing cost of reclaiming the premises upon default of the operator, and other such conditions and factors as might be relevant in determining the sum to be reasonable in light of all facts and circumstances surrounding each application. The applicant shall notify the bonding company and provide proof thereof that the township shall be notified in the event of any lapse in the effectiveness of the bond. For each acre restored and reclaimed in accordance herewith, said bond may be reduced pro-rata as determined by the Township Engineer. The amount of the bond will apply to all lands occupied by mining areas, roadways, storage areas, equipment, stockpiles and all elements of the mining operation.

(Ord. 25, passed 9-1-1999)

153.224 DRAINAGE.

Property drainage shall be provided at all times to prevent the collection and stagnation of water, and surface water shall at all times be directed in such a manner so as not to interfere with the adjoining property owners; provided, however, that the maintenance of the natural flow of surface water shall not be deemed an interference. There shall be no interference with the water table in the area. Any water areas, retention ponds, settling ponds or similar water areas shall be fenced in accordance with 153.214. Erosion control measures shall be instituted to comply with Public Act 451 of 1994, being M.C.L.A. 324.11501 et seq., as amended.

(Ord. 25, passed 9-1-1999)

153.232 CESSATION OF MINING.

Upon cessation of all mining operations and within a reasonable period of time not exceeding 12 months thereafter, all tanks, buildings, stockpiles and equipment shall be removed unless such building or structures can be lawfully used in the zoning district in which the same are located. Storage and stockpiling of mined products after cessation of mining activities may be permitted by the Commission by annual permit for that purpose only. In no event shall any additional materials be allowed to be added to these stockpiles and such a permit shall not interfere with or excuse reclamation as provided by this subchapter.

(c) Such good faith shall include sharing of technical information to evaluate the feasibility of co-location. In the event that a dispute arises as to whether a provider has exercised good faith in accommodating other providers, the township may require a third party technical study at the expense of either or both of such providers.

153.250 PURPOSE AND FINDINGS.

The township hereby makes its stated findings and legislative record related to the adverse secondary effects of sexually oriented businesses, based on the judicial opinions and reports related to such secondary effects, as detailed below.

(A) In the development and execution of this chapter it is recognized that there are some uses which because of their very nature, have serious objectionable operational characteristics, particularly when several of them are concentrated under certain circumstances or when one or more of them are located in near proximity to a residential zone, thereby having a deleterious effect upon the adjacent areas. Special regulation of these uses is necessary to ensure that these adverse effects shall not contribute to the blighting or downgrading of the surrounding neighborhood. These special regulations are itemized in this chapter.

These controls are for the purpose of preventing a concentration of these uses within any one area, or to prevent deterioration or blighting of a nearby residential neighborhood. These controls do not legitimize activities, which are prohibited in other township ordinances.

(B) In regulating sexually oriented businesses, it is the purpose of this chapter to promote the health, safety and general welfare of the citizens of the township, and to establish reasonable and uniform regulations to prevent the deleterious secondary effects of sexually oriented businesses within the township. The provisions of this chapter have neither the purpose nor effect of imposing a limitation or restriction on the content or reasonable access to any communicative materials, including sexually oriented materials. Similarly, it is neither the intent nor effect of this chapter to restrict or deny access by adults to sexually oriented materials protected by the First Amendment, or to deny access by the distributors and exhibitors of sexually oriented entertainment to their intended market. Neither is it the intent nor effect of this chapter to condone or legitimize the distribution of obscene material.

(C) Based on evidence, of the adverse secondary effects of adult uses presented in hearings and in reports made available to the Township Board, and on findings incorporated in the cases of: *Peek-A-Boo Lounge of Bradenton, Inc. v. Manatee County*, 2009 WL 4349319 (M.D. Fla. 2009); *Sensations, Inc. et al. v. City of Grand Rapids*, 526 F.3d 291 (6th Cir, 2008); *Paps AM. v. City of Erie*, 529 U.S. 277 (2000); *Thomas v. (1) Sexually oriented businesses, as a category of commercial uses, are often associated with a wide variety of adverse secondary effects including, but not limited to, personal and property crimes, prostitution, potential spread of disease, lewdness, public indecency, illicit drug use and drug trafficking, negative impacts on surrounding properties, urban blight, litter and sexual assault and exploitation;

(2) Illegal and unsanitary acts involving nudity, including lewd conduct, masturbation, oral and anal sex, occur at unregulated sexually oriented businesses, including those businesses which provide private or semi-private rooms, booths or cubicles for viewing films, videos or live performances; and

(3) Each of the foregoing negative secondary effects constitutes a harm which the township has a substantial government interest in preventing and/or abating. This substantial government interest in preventing secondary effects, which is the townships rationale for this chapter, exists independent of any comparative analysis between sexually oriented and non-sexually oriented businesses. Additionally, the townships interest in regulating sexually oriented businesses extends to preventing future secondary effects of either current or future sexually oriented businesses that may locate in the township. The township finds that the cases and documentation relied on in this chapter are reasonably believed to be relevant to said secondary effects.
